Description

The Patented Rapid Bracket® Void Detector Holder allows the installation of fire detectors into inaccessible ceiling spaces from 550mm in depth to 3000mm. Ceiling type thicknesses can range between 8 and 32mm. The Rapid Bracket® is compatible with detectors up to 128mm diameter and is designed for ease of installation and future maintenance of detectors.

The Rapid Bracket® has been specifically designed for ease of installation and future maintenance, as well as being compatible with a greater range of detectors and a larger variety of ceiling types.
